

Oxonium

Features & Benefits

- Oxonium is a non-corrosive acid with a pH < 0
- 100% solubility in water
- Reduces bicarbonates in the soil and irrigation water
- Stable chemical compound of Hydronium (H₉O₄)
- Worker safety issues eliminated as with sulfuric acid
- One time well shock treatment vs. continuous drip

Rates & Timing

Dripline Cleaning & Maintenance

Use 2 quarts - 4 gallons
per treated acre
Cleans lines with out worker safety issues.

Well Shock & Perforation Cleaning

Requires water titration
*Increases volume & efficiency.
Decreases water pH.*

Soil Nutrient Release

Use 1-10 gpa depending on irrigation
method & soil type
*Solubilizes soil nutrients.
Increases water penetration through soil profile.*
