

Fish Protein 15 Nitrogen

Product Overview

A high quality and efficient source of organic nitrogen

- Provides nitrogen, phosphate and potassium
- Spray-dried and 100% soluble

Chemistry

- Derived from a low temperature enzymatic hydrolysate product
- 100% bio-active
- Contains 80% free amino acids and small molecular peptides

Features & Benefits

- Provides necessary amino acids for plant and soil microbiological processes
- Lowest leaching nitrogen source
- Environmentally friendly
- Low Sodium; Low odor
- 100 % soluble and compatible with fertilizers

Application Guidelines

- Can be applied as a foliar spray or as a soil application
- Can be injected through controlled irrigation system or center pivots
- Can be used as a seed treatment, at planting directly over the seed, as a root dip, or drench
- See your SBC Representative for specific rates

Rates & Timing

- Apply as a foliar spray at:
 - 2 to 16 oz. per acre
- Apply as a soil application at
 - .25 to 2 lbs. per acre/application
