

GENERAL INFORMATION

Cell Power® Elona Fe can be used in combination with water soluble plant nutritional products which are formulated for foliar, sidedress or drip irrigation application. May be applied alone or in tank mixes containing fertilizers, fungicides and/or pesticides. **Cell Power® Elona Fe** is believed to be compatible with most agricultural water-soluble plant nutritional products that are deficient in iron. If physical compatibility with another fertilizer product is unknown, use a jar compatibility test. When applying **Cell Power® Elona Fe** blend as a foliar spray, always use a spreader penetrant.
