General Information

ComCat contains nutrients for soil and foliar applications. ComCat may enhance seed germination and root growth.

Directions for Use

ComCat can be applied through sprinkler foliar spray or irrigation systems. ComCat is compatible with most modern fungicides, insecticides and fertilizer materials.

Application dosage: 0.5 to 1.5 oz per acre. Dissolve ComCat in water and dilute prior to use. Apply diluted ComCat to seed or root prior to planting.

Storage

Store the product in a dry cool location. Avoid excess moisture and heat.
